Token holders

OUR EXPERTISE

On-chain

- *Solidity*
- *Rust*
- *Cairo*

SDK

- *Node.js*
- *Typescript*
- *Python*
- *Rust*

DevOps

- *AWS*
- *GCP*
- *Docker*
- *Kubernetes*
- *IPFS*
- *Full Nodes*

Blockchains

- *Ethereum*
- *Polygon*
- *Starknet*
- *any EVM compatible*

Raum Network

PATH TO INTEGRATION

Phase 1 **4-8 Weeks**

Requirement & Learnings

- Analyse the current blockchain state.
- Hire new resources as required.
- Learn the specific technical aspects of the blockchain.
- Prepare the scope and technical documentation.

Phase 2 **16-24 Weeks**

Development & QA

- Fungible token deployment.
- Update the Tokenomics and migrate required tokens to the new blockchain.
- Constant product DEX/AMM deployment.
- DEX/AMM SDK development in Node.js/Typescript.

Phase 3 **4-6 Weeks**

Testnet Testing

- Test the complete ecosystem on the testnet.
- Marketing the launch on multiple channels.
- Internal Audit.
- Shortlist the audit firms.

Phase 4 **4-6 Weeks**

Audit & Mainnet Deployment

- Implementation updates and QA as per the feedback from the 3rd party Audit team.
- Deploy token and DEX on the mainnet.
- List SDK on npm registry.

Phase 5 **Ongoing**

Support & Future Iterations

- Support the current deployment.
- Discuss the future iterations and priorities the next product to be launched in the ecosystem.
- SDK with compatibility of other languages like RUST and Python.

Thank you!
